

Encounter – new collection for active couples and young families

The new Outwell Encounter Collection of lightweight tents is ideal for active couples and young families. Freedom is the watchword with two stunning tent ranges – Cloud and Earth – created using time-proven tunnel and dome tent designs to provide comprehensive reliable options for

long weekends, touring and those spontaneous getaways that we love so much.

All Encounter tents are made from the brand's exclusive Moroccan Blue/Neutral Grey Outtex 3000 flysheet fabric with a 3,000mm hydrostatic head waterproof rating for reliability and durable performance combined with easy care and maintenance. A detachable bathtub groundsheet cuts out draughts, water ingress and crawling insects. Quality, durable fibreglass poles are used for fast pitching through the Power Mesh Pole Sleeves that mimic the aerodynamic properties of the flat pole sleeve found in many technical tents.

Other Encounter features include D-shaped door entries for easy access; luminous guylines for safety; and the unique Taped Hanging Point System which attaches the inners with a toggle through each suspension point that is taped to the tent for strength and security.

Earth tunnel tents (pictured left) comprise four models that sleep two, three, four and five respectively in single bedrooms that sit behind the large porch area. This is lit by side windows with vents above to keep the area light and airy. All tents have a large D-

shaped front door and the Earth 3 to 5 tents also have L-shaped side doors.

Cloud tents (pictured right) provide similar options to the Earth, but in the dome style for added choice, with headroom concentrated at the apex of the inner tent rather than at the front of the inner tent and porch.

Editor's notes

Outwell and Outtex are registered trademarks.

Outwell celebrates its 20th anniversary in 2015.

Encounter tent features include:

Unique taped hanging point system – Attaches the inners to the flysheet with a toggle through the suspension point taped to the tent for strength and security; inners can be left in place when packing up the tents.

D-door entry with side access – enables easy access and an airy, well-protected interior as the fabric can be rolled away completely and quickly closed up as required in bad weather.

Power mesh pole sleeves – are made from a strong mesh fabric that ensures a flexible, durable pole channel for the fibreglass poles. The lightweight fabric ensures that air flows through for an aerodynamic flat pole sleeve effect.

Fibreglass poles – offer reliable performance and durability with a hollow core for light weight and flexibility. They form a strong and stable structure that copes easily with strong winds.

Colour-coded poles – ensure that the right poles are threaded through the correct pole sleeves for no-fuss, first time pitching. A big plus in bad weather!

Organiser pockets – ensure items don't get mislaid by tired campers after busy days having fun outside

Toggle-up curtains – behind the twin windows ensure privacy when required and plenty of natural light when fastened securely.

Outwell Sleep Comfort Rating – to aid market comparison we include the quoted number of people that an Outwell bedroom can sleep as stated by the industry standard. However, we also quote our own Outwell Sleep Comfort rating to recommend the number of campers that a tent can sleep comfortably.

RRP: Earth 2 £64.99; Earth 3 £99.99; Earth 4 £119.99; Earth 5 £169.99

Cloud 2 £69.99; Cloud 3 £89.99; Cloud 4 £109.99; Cloud 5 £149.99
