

## NEW OUTWELL SLEEPING BAG DELIVERS LAVISH COMFORT

The luxurious new Constellation range of Outwell sleeping bags offers unrivalled levels of comfort in an attractive eye-catching package that will grace any tent, caravan or motorhome. These single and double sleeping bags from the award-winning innovative family camping brand have a chic blue super-soft touch polynylon shell that works perfectly in conjunction with the brushed cotton lining and quality Isofill

insulation to deliver a snug bed that will appeal even to the most discerning camper.

These features alone create the perfect place to snuggle into for a great night's sleep. But to help maintain the ideal temperature and for easy access the Constellation range also has a two-way L-shape zip with auto lock which also facilitates the connection of two single bags to create a double. The provision of a zip-off hood ensures easy conversion to a duvet for versatile use (pictures right).

Extra insulation and comfort are provided by a full length baffle. Such quality build provides excellent Tcomfort ratings that make a Constellation sleeping bag an ideal choice for campers who demand the best for late-spring to autumn use.

The flagship sleeping bags also feature corner inner attachment points to hold an optional Outwell inner bag securely in place. These are considered by many campers a necessity in order to keep a sleeping bag clean and add extra insulation when needed.

The Constellation (pictured above left) and Constellation Double (pictured below left) sleeping bags are supplied in a square pack sack for easy transportation and convenient storage.

Outwell and Isofill are registered trademarks

Outwell celebrates its 20<sup>th</sup> anniversary in 2015.

**RRP:** Constellation £99.99; Constellation Double £159.99

**Temperature and season ratings** - To determine temperature limits of sleeping bags objectively, the European Standard EN13537 on requirements for sleeping bags specifies the use of a computer-controlled thermal manikin similar in shape and size to the human body. A sleeping bag containing a manikin is placed inside a temperature-controlled climate chamber and tested in accordance with a prescribed procedure to determine the thermal insulation properties of the bag. Recommended temperature limits are based on the insulation properties measured and on knowledge of how the human body reacts to thermal conditions during sleep. (All double bags are tested with one manikin only and therefore the temperatures are most likely to be different from the one stated if two people are using the bags).

On each of our sleeping bags we quote the recommended temperature ratings for the following:

**Tcomfort** – lower comfort limit in standard use (woman)

**Tlimit** – lower limit when curled up in standard use (man)

**Textreme** – lowest extreme temperature for survival (woman)

**Tmax** – upper comfort limit without over heating (man)

The Constellation has a Tcomfort rating of -2°C, Tlimit -8°C, Textreme -26°C and Tmax 21°C.

The Constellation Double has a Tcomfort rating of 0°C, Tlimit -6°C, Textreme -24°C and Tmax 21°C.

### **Constellation Specifications**

Open size	Constellation 230 x 90cm (LxW); Constellation Double 230 x 160cm
Body length	200cm
Shell	Polynylon (85% polyester / 15% nylon)
