

SNUGGLE UP IN AN OUTWELL CAMPER SLEEPING BAG

Camping is all about relaxation and a good night's sleep is vital when it comes to recharging your batteries. That's why the Outwell range of Camper single and double sleeping bags remains a firm favourite with discerning families looking for a comfortable bed to snuggle into at the end of the day. And smart new colours and neat stitching pattern lifted by trademark Outwell stripes ensure a Camper sleeping bag looks as good as it performs, raising the bedroom experience to new heights for 2015.

An Outwell Camper sleeping bag feels as good as it looks as performance, comfort, style and flair come together in this focused range. Soft polycotton outers and linings, quality Isofill insulation and superior cut create a comfortable environment that is enhanced by carefully thought out features. Warmth is guaranteed by offsetting the two layers of Isofill used to minimise the formation of cold spots while a full length baffle provides next-to-the-skin insulation and comfort over the zip.

The rectangular design allows your legs freedom of movement for unrestricted comfort. The shape combined with the L-shaped two-way auto lock zip with anti-snap for easy running means sleeping bags easily zip together to create a double or convert a single bag to a full duvet for added versatility. And to aid such use all the Camper bags feature a zip-off hood with an integral pillow for convenience.

Each sleeping bag features corner liner attachment loops to hold an inner liner in place. These important options provide extra insulation and can be removed for easy cleaning – raising hygiene levels while extending the life of a sleeping bag by keeping it clean. Outwell quilted, cotton and polycotton liners from its Comfort Essentials Collection provide campers with a choice of ways to customise their sleeping experience.

Camper sleeping bags are supplied in square pack sacks for easy transportation and storage.

Temperature and season ratings - To determine temperature limits of sleeping bags objectively, the European Standard EN13537 on requirements for sleeping bags specifies the use of a computer-controlled thermal manikin similar in shape and size to the human body. A sleeping bag containing a manikin is placed inside a temperature-controlled climate chamber and tested in accordance with a prescribed procedure to determine the thermal insulation properties of the bag. Recommended temperature limits are based on the insulation properties measured and on knowledge of how the human body reacts to thermal conditions during sleep. (All double bags are tested with one manikin only and therefore the temperatures are most likely to be different from the one stated if two people are using the bags).

On each of our sleeping bags we quote the recommended temperature ratings for the following:

Tcomfort – lower comfort limit in standard use (woman)

Tlimit – lower limit when curled up in standard use (man)

Textreme – lowest extreme temperature for survival (woman)

Tmax – upper comfort limit without over heating (man)

The Camper has a Tcomfort rating of 5°C, Tlimit 0°C, Textreme -15°C and Tmax 23°C.

The Camper Lux has a Tcomfort rating of 0°C, Tlimit -6°C, Textreme -23°C and Tmax 21°C.

The Camper Supreme has a Tcomfort rating of -3°C, Tlimit -9°C, Textreme -28°C and Tmax 21°C.

The Camper Lux Double has a Tcomfort rating of 5°C, Tlimit -1°C, Textreme -16°C and Tmax 22°C.
