

## ROBENS INFLATABLE YURT SPEARHEADS NEW TENT RANGE FOR ADVENTUROUS FAMILIES

The Robens Airventure range is a new concept that addresses the needs of the more adventurous family seeking a choice of inflatable tents that combine performance with practicality.

The technical heritage is obvious in the quality materials that include Yunan alloy brow poles where needed and the use of the award-winning brand's new HydroTex Polycotton RS – a quality dense-weave ripstop polycotton that enhances the tent's microclimate by stabilising temperature

fluctuations and eliminating condensation. Tried-and-tested inflation technology and cleat guyline adjusters are just two features that complement the materials to ensure ease of use and weather-beating performance that's rigorously tested in the Robens in-house test facilities.

The range includes three time-proven tunnel designs; the Vista 400, Lookout 500 and Woodview 600. These are complemented by the eye-catching eight-berth Aero Yurt – a new creation inspired by the dwellings used in the steppes of Central Asia and developed for those people who want to stand out from the crowd.

The Aero Yurt (pictured right and above) inflates quickly and easily from a single valve. It stands out on the camp ground where this versatile tent provides multiple applications, including eight-person bedroom/living area, meeting room, play area, hang-out and more. Internal curtains at the windows enhance the impression that this has traditional-style solid walls yet can be rolled up for views out. The front door has a mesh panel behind and low vents aid air flow.

The Vista 400 (pictured left) is an inflatable four-person tent ideal for those who regularly move between camp grounds. It has a small porch for all-weather protection of the front door that features a mesh panel behind to help keep the tent insect-free. New low vents are positioned to enhance views out of the large windows. The inner tent sleeps four in a single compartment.

Ideal for longer stays at basecamp, the Lookout 500 (pictured right) is a large inflatable five-person tent with a large porch for sheltered outside living and all-weather protection of the front door and window. The front door features a mesh panel behind to help keep the tent insect-free. New low vents beneath the side windows enhance views out of the large windows. The inner tent is divided in two to sleep in a 3+2 configuration.

The Woodview 600 (pictured left) six-person inflatable tent adds even more living area and protected porch space for group and family living in comfort. The inner tent is divided in two to sleep in a 3+3 configuration.

**RRP:** Aero Yurt £1,499.99; Vista 400 £1,249.99; Lookout 500 £1,374.99; Woodview 600 £1,749.99

Robens continues to test all its tents using its own in-house facilities and, during the tests, register the maximum (MAX) speed impact a tent was subjected to and the average (AVG) wind speed at which structural instability occurred. Structural instability may show as the collapse of tent, returning to shape when the wind drops, or a broken/deformed pole. At no point did Robens encounter any form of catastrophic failure up to the maximum wind speed and an icon is now used, including on the Robens website, to show the MAX and AVG figures for each tent. The Wind Test figures are:

Aero Yurt MAX 95km/h and AVG 95km/h

Vista 400 MAX 130km/h and AVG 123km/h

Lookout 500 MAX 140km/h and AVG 118km/h

Woodview 600 MAX 130km/h and AVG 113km/h
