

OUTWELL BRINGS ELECTRICAL CONVENIENCE TO THE OUTDOOR KITCHEN

With electric hook-ups becoming more accessible than ever and often included in a site fee, it makes sense to use technology to make outdoor life more convenient, comfortable and safe. And the new Outwell Kitchen Electrics Range offers a variety of 230V solutions in preparing meals for couples, families and groups of friends.

Designed for European and UK operation, all have been rigorously tested to conform to current safety standards, with additional benefits including flameless operation without producing harmful carbon monoxide.

The range comprises five models:

**Whitby Skillet** (pictured right) – This deep 1,300W skillet is easy to use and ideal for hearty stews, roasting or frying. And, if you select the warm setting on the easy-to-read adjustable temperature control, you can serve the food direct from the skillet. The non-stick coating takes the stress from cleaning up after dinner. The Whitby features heat resistant handles, a toughened glass lid with handle and safety valve. It comes with a 2.5m cable.

**Selby Griddle** (pictured left) – A flat non-stick easy-clean grill plate is the perfect way to remove excess grease for a more natural fat-free grilling process. And, the 2kW Outwell Selby Griddle brings convenient, healthy cooking to the campsite kitchen. Adjustable temperature control and a thermostat with indicator light offers flexible cooking for optimum taste. The Selby features an easy-clean non-stick coating, heat resistant handles and a 2.5m cable.

**Darby Grill** (pictured right) – Barbecues are often a favourite campsite pastime and the 2kW Darby Grill provides a flat and ribbed grill with a non-stick coating that's easy to clean. Fat-free cooking is enhanced by a drain that channels excess fat into drip tray. Its detachable lid converts to windshield and the adjustable thermostat fine tunes cooking. The base includes a spice-holder and the Darby has a 2.5m cable.

**Danby Contact Grill** (pictured left) – Rustle up a quick toastie or perfectly grill fish and steak with the 1.6kW Danby Contact Grill. It functions in three positions, including table grill, and the adjustable thermostat with indicator lamp provides the ideal cooking temperature. It features an easy-clean non-stick coating, heat resistant handles and a 2.5m cable.

**Grimsby Induction Hob** (pictured below right) – If a suitable power source is available then many campers consider the use of an induction hob a no brainer. Flameless, fast cooling, no noxious gasses and faster than conventional cooking systems, these energy-efficient hobs have many benefits. The slim-profile Grimsby has easy-to-use touch selection for fast temperature control and an easy-to-clean glass surface. It comes with a 2.5m cable.
