

EASY CAMP TOUR TENTS PERFECT BUDGET-BEATERS FOR ENTRY LEVEL FAMILY CAMPERS

Couples and families with young children, who seek reliable holiday comfort will appreciate the superb value for money, attention to detail and quality offered by the Easy Camp TOUR range of six striking tents.

Easy to understand and easy to pitch, the attractive tunnel designs offer proven comfort, versatility, convenience with great internal space. Performance is provided by a quality

fire-retardant polyester outer with a 3,000mm hydrostatic head and fully taped seams. Pre-angled colour-coded fibreglass poles ensure maximum headroom is provided throughout.

Carefully positioned vents and new rear ventilation ensure maximum airflow to keep the interior cool during the day and to control condensation, while large windows let in plenty of natural light – curtain panels toggle into place for privacy when needed. Where relevant, the tough full sewn-in groundsheets lie flat at the front doors or fastened up to suit conditions.

All tents are packed with design detail that includes the new Sleep-Tight Inners that cut down external lighting and early dawn sunshine for enhanced sleep comfort. Other features include insect-proof mesh inner doors, electric cable access point, D-shaped front doors and guylines retainers.

TOUR tents come in two styles. The Palmdale 300, 400, 500 and 600 (pictured above right) models provide size options to sleep three to six. Front entry to each tent living area is protected by a deep porch that also offers a sheltered outside living area. The 500 and 600 versions include a side door for extra convenience.

Palmdale 500 and 600 Lux (pictured left) models offer an additional third zone at the front of the tent. This enclosed room is an ideal 'wet' area for muddy kit and storage of outdoor toys and furniture when off site, keeping the living area dry and clean. The central living area can also be accessed by an external side door.

Optional extras include carpets and footprints for groundsheet protection. Lux footprints extend into the third zone for ground cover when required.
