

ROBENS COMBINES RETRO STYLE WITH TECHNICAL EXCELLENCE ACROSS NEW OUTBACK TENTS, BED ROLLS AND FURNITURE

Award-winning technical tent brand, Robens, has added three new tents and two porches to its superlative Outback range to extend options and offer yet more choice of eye-catching models that capture the essence of the back-to-basics bushcraft approach to life outdoors. And the award-winning brand has extended the concept into sleeping bags and furniture to provide enhanced levels of luxury that enhances appeal with the modern adventurer.

All tents capture the spirit of early American pioneers, sympathetically combining modern technical materials and feature developments with retro designs to ensure today's pioneer enjoys the best in comfort and reliability. The good-looking tents use Robens own HydroTex Polycotton to enhance an Outback tent's microclimate by stabilising temperature fluctuations and eliminating condensation.

The ten-person Apache tipi (pictured right) pitches quickly and easily using three aluminium alloy A-frames to create a huge pole-free living area with entrances front and back that both feature good-size windows with curtains. The front door extends out to protect access to the ample living space. The Apache features a zip-out groundsheet to aid storage, maintenance and pitching. Ventilation provided by the Internal Apex Vent Control that is simply operated from inside to control air flow.

The eight-person polycotton Chinook tipi (pictured left) uses an aluminium alloy A-frame to turn the large door with windows and curtains into an extension that protects access to the ample living space. It features a mesh panel behind to enhance the insect-free ventilation provided by the Internal Apex Vent Control that is simply operated from inside. The groundsheet unzips to the centre alloy pole, enabling it to be rolled away to create a safe area in which to use the optional stove and store wet gear

The Trapper Twin (pictured right) builds on the success of the Trapper to provide four people comfortable living space and two inner bedrooms in a vis-à-vis style. Weather-beating stability is provided by two steel A-frames linked by a ridge pole and a sturdy zip-in hooped porch pole. The large porch features eaves that spread guyline loading while protecting the door zip from water run-off. The groundsheet can be unzipped in the porch to create a wet area. A mesh panel behind the main door enhances insect free ventilation on hot days.

The addition to the range of a Front Porch and Universal Porch Tarp extends outside living area and protects access for Outback tents with A-frame access. The Universal Porch Tarp can also be used on its own.

The Outback range of tipis, bell tents and tents benefits from a superb range of accessories created to enhance the 'bushcraft' experience and a new sleeping bag and furniture range open untold comfort levels.

The two sleeping bags in the Prairie range (XL pictured right) capture the essence of the traditional American bed roll using MicroThermo insulation sandwiched between a rough canvas shell and soft flannel lining. An oversize YKK L-shaped two-way zip offers easy access and ventilation options. Six snap buttons are used to secure the detachable double base layer that acts as a head rest – loose pillow included. The fabric head rest features straps so it can be used as a carry bag to secure the Prairie bed roll.

Robens introduces a range of luxurious Outback furniture for 2019 to complement its tents and rustic living ethos. Close attention to detail has created versatile, practical padded and bamboo options with huge appeal with pioneers and glampers alike. With roots firmly in retro style, the modern materials, advanced design techniques and stunning looks ensure broad desirability with those looking for comfortable, performance furniture that makes a bold statement.

Chairs include the Peta (pictured top right) and lower Simi – perfect for smaller tents – that feature a sturdy aluminium frame that supports soft padding for comfort and insulation with a highly breathable centre fabric for warm days. Individually adjustable legs compensate for uneven ground and tailor height while wide feet take care of soft ground, Great back support and fully adjustable backrest, plus wide, comfortable armrests, enhance comfort. The resin-topped Talula (pictured left) provides a good-looking yet rugged table for dining and socialising.

Glampers will appreciate the Outback style of the Titus (pictured right) and more relaxed Kaya (pictured left) chairs that have a light, stable bamboo frame with soft, highly breathable double fabric to enhance comfort. Good looks are guaranteed by this stunning polyacrylic/polyester fabric that mimics high quality natural fibres yet benefit from the easy-care characteristics of a synthetic. These chairs are complemented by the chic, practical bamboo Tobey table (pictured right).

The new furniture range includes the ultra-comfortable padded Tala bed (pictured right), the handy Mace bag (pictured bottom left) for firewood or other storage, and the Rafi Transporter to help move equipment between vehicles and camp ground.

RRP: Apache £1,249.99; Chinook £874.99; Trapper Twin £1,374.99; Prairie £124.99; Prairie XL £149.99; Talula £124.99; Peta £109.99; Simi £74.99; Tala £169.99; Mace Bag £24.99; Rafi Transporter £79.99; Titus £124.99; Kaya £149.99; Tobey £199.99

Robens continues to test all its tents using its own in-house facilities and, during the tests, register the maximum (MAX) speed impact a tent was subjected to and the average (AVG) wind speed at which structural instability occurred. Structural instability may show as the collapse of tent, returning to shape when the wind drops, or a broken/deformed pole. At no point did Robens encounter any form of catastrophic failure up to the maximum wind speed and an icon is now used, including on the Robens website, to show the MAX and AVG figures for each tent. The Wind Test figures are:

Apache MAX 168km/h and AVG 153km/h

Chinook MAX 160km/h and AVG 150km/h

Trapper Twin MAX 160km/h and AVG 150km/h
