

TOUGH NEW OUTWELL TENT FABRIC PROTECTS ALL-WEATHER CAMPERS

Discerning campers looking to extend their camping season can now benefit from a superlative new durable fabric launched by innovative family camping brand, Outwell.

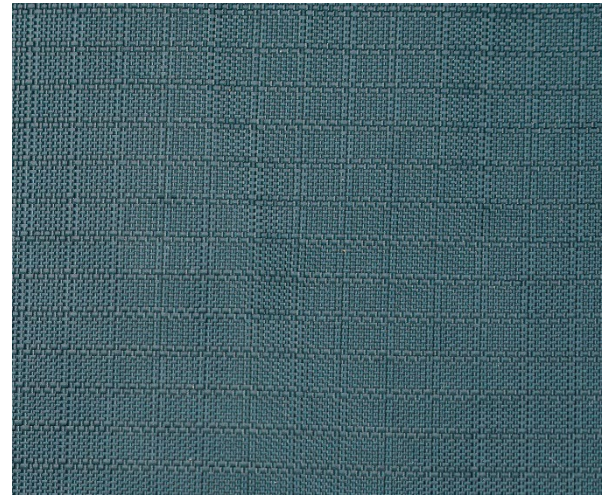

Outtex 6000 Endurance RS fabric is a unique Outwell double ripstop Oxford polyester with a 6,000mm hydrostatic head thanks to its PU coating. It is four times stronger than traditional Outwell fabrics for ultimate resistance to the rigours of all-weather camping.

At the heart of its performance lies two reinforcing threads that run in a square pattern throughout the weave (pictured below right). These enhance structural strength while preventing any puncture or tear from spreading until a repair can be initiated.

As all Outwell fabrics, Outtex 6000 Endurance RS is fire retardant and features a durable water repellent coating to help shed water and dirt. It also has a high UPF 50+ rating for when the sun shines.

This durable addition to the award-winning manufacturer's quality fabrics can be found in the latest Superior Air Collection. Comprising six tents, it features the very best in Outwell innovation to provide superb family accommodation that offers the ultimate camping experience in comfort, safety and style – no matter the weather.
