1. CEO-STATEMENT (102-14)

“SOCIAL AND ENVIRONMENTAL
ISSUES NEED ADDRESSING
NOW FOR THE SAKE OF
FUTURE GENERATIONS”

The past year has seen us all confront an influx of major daily challenges that have accelerated the change of global values, with focus on environmental and social issues we are duty-bound to address for the sake of all affected by our business.

We recognise sustainability now dictates any commercial action if a business wants to successfully engage with the ever-growing number of enlightened consumers. And we are receptive to the increasing focus that Oase Outdoors stakeholders and target markets place on social and environmental issues. Given our main footprint lies in our trade conducted with independent Far Eastern manufacturers, these remain a priority.

While Covid 19 has accelerated social and environmental awareness, driven by concern of its impact on society, it has also slowed response to issues. We previously highlighted we operate in markets with extended risk so preventative anti-corruption and social compliance initiatives are key considerations. Although we continue to build on our anti-corruption policy, to identify and integrate the key industry supported audited process to assess social compliance, and to improve due diligence processes related to business partners, the current pandemic has slowed progress.

It has also put pressure on maintaining employee satisfaction that is fundamental to our DNA as lockdown and daily challenges impact our work culture and engagement. However, our annual Great Place To Work initiative and targeted surveys continue to help address this important sustainability issue.

We also extend our commitment to working with a Product Safety Programme to ensure food and safety aspects and chemical management comply with relevant standards. We have grown our resources to meet the ever-expanding task directly proportional to the ever-increasing focus and legal requirements this area attracts.

Sustainability has become a core consideration to business and consumers alike and we remain committed to fulfilling our responsibilities. I again invite all employees and associates to join our journey to become an even better and more sustainability-conscious business partner.

A handwritten signature in black ink, appearing to read 'Henrik Arens'. The signature is stylized and fluid.

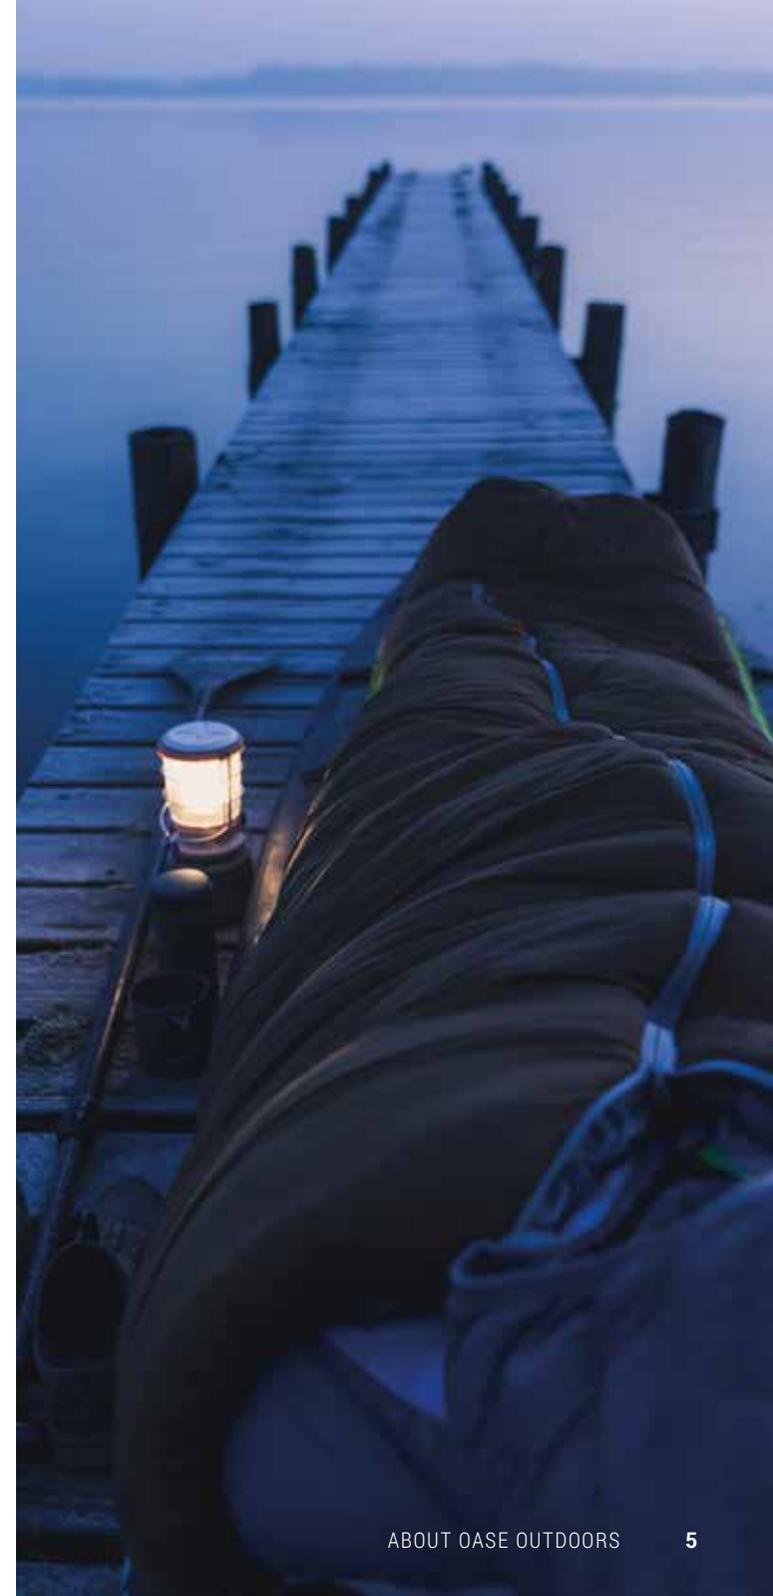

Henrik Arens
CEO, OASE OUTDOORS APS

2. ABOUT OASE OUTDOORS – AND THE REPORT

Oase Outdoors at a glance

Oase Outdoors was founded in 1984 by Mogens Arens in Vejle, Denmark and, while part of the Ratos group since 2016, it is today run by his son, Henrik Arens, from the company head office in Give, Denmark. The company specialises in the innovation and development of tents and equipment for camping and outdoor life.

The products are sold through a network of dealers and agents in 45 countries, with main markets being the Nordic countries, UK, Netherlands, Germany and Czech republic. It currently has 80 employees, with showrooms in Give and Holland, and its own office in Shanghai. This is its fourth sustainability report.

OUR VALUES

INTEGRITY

We strive to be valuable and trustworthy partners in business, we are accountable, and we stick to our agreements.

INNOVATION & DESIGN

We always challenge the standards to create the future within our business.

COMMERCIAL MINDSET

We always optimize commercial terms and seek opportunities. We are never complacent.

WE MAKE IT HAPPEN

There is a short way from idea to action.

ATTENTION TO DETAIL

We emphasize professionalism through attention to detail, precision and follow-up.

ENGAGEMENT

We engage ourselves, we have a 'can do' mentality and we strive to make Oase Outdoors a place where people thrive and develop.

PASSION

We are passionate about Outdoor Living.

2.1. VALUES, PRINCIPLES, STANDARDS AND NORMS OF BEHAVIOUR (102-16)

Oase Outdoors is proud to endorse and maintain the highest business ethics with integrity and our core values at the very heart of everything we do.

Alongside our work on the selected topics here, we are active member of a number of organizations, including EOG (www.europeanoutdoorgroup.com/) and EOCA (www.eocaconservation.org) and we help to bring sustainable development to the top of the European Outdoor agenda.

2.2. ACTIVITIES (102-2)

Oase Outdoors is the parent company to three independent camping and outdoor brands: Outwell®, Easy Camp® and Robens®. Through our brands we aim to be a one-stop shop for those who enjoy camping and outdoor life. Each brand is targeted to meet the needs of three distinct categories of camper:

- Outwell – Innovative Family Camping
- Easy Camp – Entry Level Camping
- Robens – Outdoor and Adventure

We offer a broad range of camping and outdoor products, including:

- Tents
- Camping furniture
- Sleeping bags
- Sleeping mats and airbeds
- Backpacks/bags
- A comprehensive range of camping accessories

Our in-house design team creates and develops our products, which we manufacture in China, Vietnam and Bangladesh. The consumer plays a significant role in our design and development process. Via our test family programme, Internet panels and a range of social media engagement and surveys, we strive to maintain consistent focus, always involving the consumer in a constructive dialogue on the development of the camping and outdoor products of tomorrow.

We have numerous patents and innovative IP-protected registrations and Oase Outdoors is one of the market leaders in functional, innovative and easy-to-use camping and outdoor products.

2.3. LOCATION (HQ AND OPERATIONS)

(102-3, 102-4)

Our main office is located at Kornvej 9, DK-7323 Give, Denmark – not far from Billund Airport in West Denmark, which allows us to offer our customers and business partners easy access to our facilities. Our 10,000 m² premises houses our highly competent R&D, purchasing, sales, marketing and administration teams. Along with our offices and warehouse facilities, we have an inspirational 2,500m² showroom and large outdoor display areas. Our products are tested both in the Far East and at our own R&D facilities in Denmark, where we operate some of Europe's top test facilities. In addition to our headquarters in Give, we have sales offices in several European countries and an office in Shanghai, China, that helps ensure that we are close to our suppliers. Our Shanghai office has been operational for more than 20 years and is staffed by our own employees.

2.4. Ownership structure / governance (102-5)

Oase Outdoors ownership structure sees Ratos with a 78 per cent interest and the balance spread between Arens and one senior member of the management team. The company is overseen by a Board of Directors comprising four members.

2.5. Markets (102-6)

Oase Outdoors is currently active in 45 countries, with the five core markets being Scandinavia, Germany, the Netherlands, Czech Republic and the United Kingdom.

Each marketplace has a unique retail network that reflects each of the Oase Outdoors brand's target audience and the outlets available to effectively service the product portfolios.

2.6. Value chain perspective

(102-9, 102-10)

While all products are designed at the company's Danish head office, production is carried out in China, Vietnam and Bangladesh. Our Far East network comprises just over 100 suppliers but with a large concentration of purchase at a top five level. Given our relationship with our suppliers it is here that we have the greatest positive social and environmental impact on our surroundings and we have no recent significant changes had in our supply chain that could negatively affect our position.

2.7. Scale of the organization

(102-7, 102-8, 102-41)

In 2020, Oase Outdoors employed 87 people in 80 permanent positions with a 60/40 split between male and female, plus ten seasonal part time workers. Employees outside the Danish head office comprised four in the UK, one in the Netherlands, one in Norway, one in Czech Republic, three in Germany and two in Shanghai, China. We each season keep 1500 Stock Keeping Units. Annual net sales for 2020 were 301 million dkr – for further financial information please see our annual report at [Ratos homepage, ratos.se](https://www.ratos.se)

3. ABOUT THE REPORT

This is Oase Outdoors' fourth annual sustainability report and covers the 2020 fiscal year. This report references GRI 101: Foundation 2016, GRI 102: General Disclosures 2016 (most disclosures on level Core, see GRI index), Disclosures 103-1, 103-2 and 103-3 from GRI 103: Management Approach 2016, Disclosure 205-2 from GRI 205 Anti-corruption 2016, Disclosure 414-2 from 414: Supplier Social Assessment 2016. The report has not been reviewed in full by a third party. Additional information about our ownership structure, financials and governance can be found on the Ratos website, ratos.se

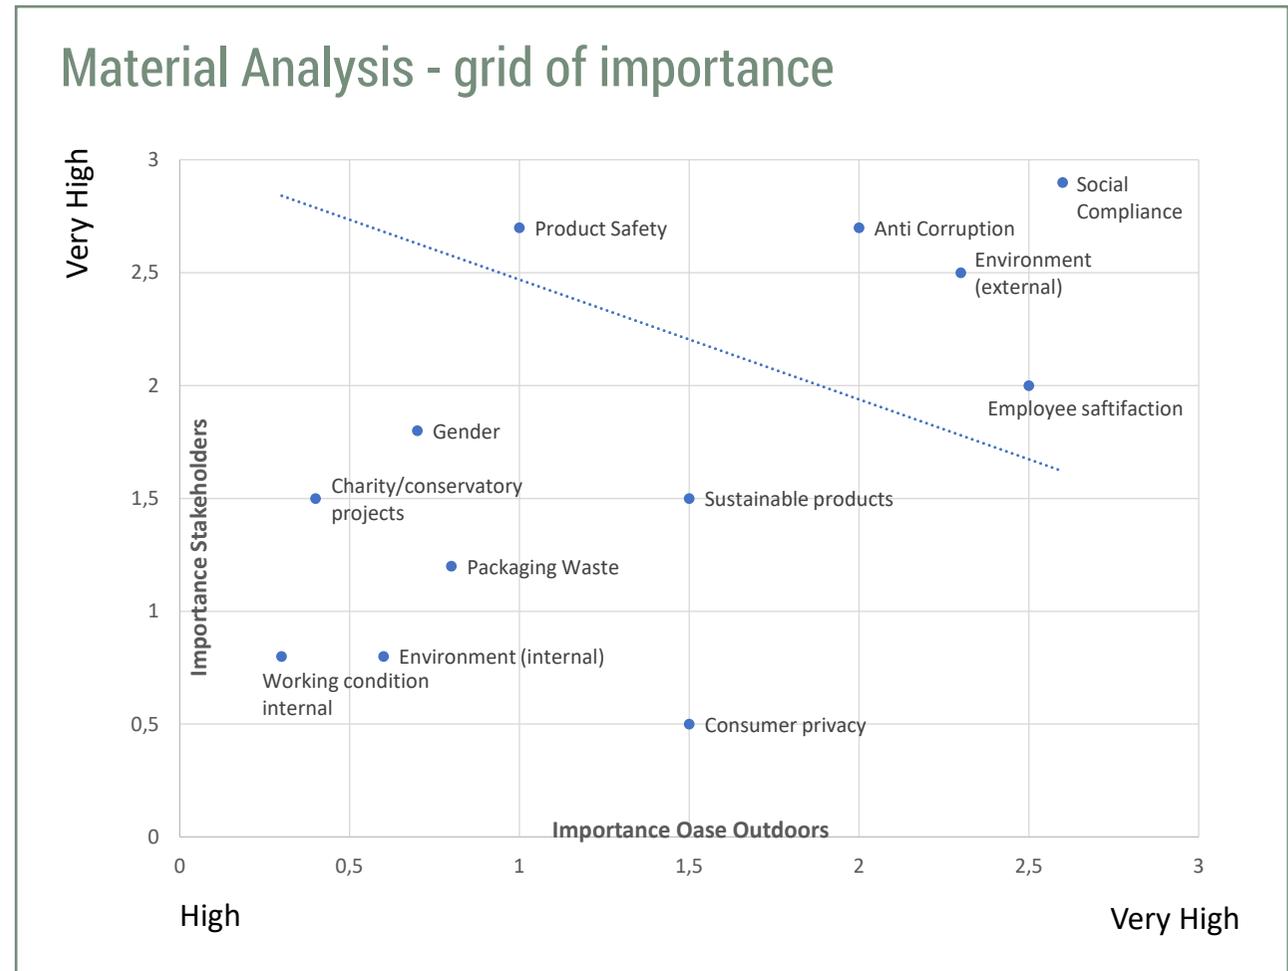

3.1. Process

We have tried to live up to the ten reporting principles (see GRI framework for more information about these ten principle). This being our third report, we are unable to report on all KPIs, but work to address these areas has started and will continue. Product Safety is also one of the key areas found in the material analysis. Product safety is already high on the agenda and since 2016 we have been working with a specialized company within this area to make sure that our products and procedures comply to the legal requirements in our markets. Product Safety has been omitted in this sustainability report due to resource constraints, but our aim is to include more on Product Safety and we

have recently employed one more Compliance Manager so the team now consists of two.

We first conducted a stakeholder analysis, including a small consultation process with customers and employees. We then analysed our own context to define the key areas in the value chains for us to investigate the impact of our

footprint and sustainability. Finally, we targeted the critical areas that lie above the dotted straight line in the Material Analysis diagram below, for comprehensive action. We did not include all stakeholder, but we will investigate the possibilities of conducting further stakeholder dialogue with other stakeholder groups during 2021.

3.2. Stakeholders

(102-40, 102-42, 102-43 and 102-44)

Given we operate in markets with extended risk, preventative anti-corruption and social compliance initiatives are essential. Our customers and end users also have elevated expectations of Oase Outdoors as a valued partner and home to premium brands.

3.3. Scope

The boundaries of this report are limited to the most important part of our value chain. We are focusing on our suppliers (BSCI) and our own employees (anti-corruption and employee satisfaction level).

List of stakeholder groups and stakeholder engagement

OASE OUTDOORS STAKEHOLDERS AND FORM OF DIALOGUE

Stakeholder	Form of Dialogue	Key topic raised by stakeholder	Topics incl. Yes/No
Employees	Annual employee satisfaction survey with information shared on the intranet	Motivating and developing employees Safe and healthy work environment Reduce climate impact	Y Y Y
Customers	ongoing part of dialogue in the future	Product safety Reduced climate impact	N N
Suppliers	Dialog, audits, quality control visits and visit from head office staff	Not included in stakeholder analysis	n.a.
Ratos	Board of Directors	Compliance issues Anti-Corruption training Wish for Sustainable product category	Y Y TBA
Authorities	Working with Bureau Veritas – a consultancy providing guidance and advice to ensure all legal requirements are fulfilled on products	Product safety Anti-corruption	N Y

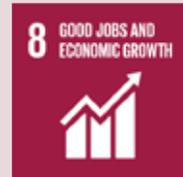

3.4. Important subjects

Three key topics have been selected after the materiality assessment (see boxes). Although not measured to the UN Sustainable Development Goals (SDG) we find it relevant to see our topics in a broader world perspective. Our key topics support among others the below four SDGs.

UN Sustainable Development Goals:

Oase Outdoors KPIs on Sustainability

Related to SDG 8.5

High Risk suppliers (determined by internal risk assessment) to be included in the Business Social Compliance Initiative (BSCI) framework under amfori BSCI. The KPI is to have 15 suppliers in BSCI by 2022.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: GRI 400-Social

GRI Disclosure: 414-Supplier Social Assessment

GRI Indicator(s): 414-2: Negative social impacts in the supply chain and actions taken

Related to SDG 8.3

Employee satisfaction min. 80 per cent, measured as Trust index from the Great Place to Work (GPTW) survey.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: None

GRI Disclosure: Own disclosure

GRI Indicator(s): Own indicator: Trust Index for 2021 in per cent

Related to SDG 16.5

Compilation of an Anti-Corruption policy and implementation of a learning program. Minimum 90 per cent of relevant employees to complete a learning program with the result "pass", based on a "Pass/ Fail" basis.

Relevant GRI Standard, Disclosure and chosen indicator(s):

GRI Standard: GRI 200-Economic

GRI Disclosure: 205-Anti-Corruption

GRI Indicator(s): 205-2: Communication and training on anti-corruption policies and procedures

4. SUSTAINABILITY SUBJECTS

4.1. Anti-Corruption

4.1.1. Why relevant

Not only is the implementation of an anti-corruption policy an Ownership requirement by Ratos and a part of the compliance of doing business, but it is vital to business success as the long-term sustainability of our business depends on our ability to maintain the highest standards of personal and collective integrity.

4.1.2. Scope

Given the need to protect its position as a trusted business partner, relevant Oase Outdoors employees who act under the Oase name will be regulated by this policy.

4.1.3. Management approach

We have developed a strong judicious approach to this area and have started the implementation. A set of directives and FAQs for employees have been made and has now also been stated in the

Employee staff handbook. We have also introduced a whistle-blower system where infringements can be reported in confidence.

4.1.4. Activities

We have started the anticorruption training programme and all directors have completed it. The HR department is undertaking the training and expect a minimum annual pass rate of 90 per cent of relevant full-time employees for the years to come.

4.1.5. Results

The Anti-corruption policy is now in place. 27% of relevant employees have completed the training but we have not had any further development in the figures due to Covid19. During 2021 the training will continue.

4.1.6. Indicators

205-2: Communication and training on anti-corruption policies and procedures.

Share of relevant employees (22) that annually complete the anti-corruption training course is set to 90%.

4.2. Supplier Social Assessment

4.2.1. Why relevant

Mirroring environmental issues, our biggest social impact is made sourcing a diverse range of products, often from suppliers located in high risk countries.

4.2.2. Scope

The assessment will only include our high, medium and low risk direct suppliers.

4.2.3. Management approach

The Business Social Compliance Initiative (BSCI) is a leading supply chain management system that supports companies drive social compliance and improvements within the factories and farms in their global supply chains. Amfori BSCI implements the principle international labour standards protecting workers' rights. We follow the amfori BSCI framework with commitment and in accordance to the amfori BSCI set up, overseen by a Quality Department member of staff.

4.2.4. Activities

We are now fully trained in the framework, have performed a risk analysis amongst our 110 direct suppliers, completed a supply chain mapping and started dialogue with suppliers. We are currently working hard to get our biggest high-risk supplier into the framework.

4.2.5. Results

The 15 suppliers in the table to the right have now been incorporated into the amfori BSCI framework under which they will now be measured. These 15 'suppliers' account for 17 factories in total and account for around 70% of our turnover.

We are working to sustain the numbers of suppliers under the Framework in 2021. We will work more indepth with the 15 suppliers and we anticipate a larger volume of our purchase to be evaluated under the framework as we will increase our purchase volume at these 15 suppliers in 2021.

4.2.6. Indicators

414-2: Negative social impacts in the supply chain and actions taken.

Determined by an internal risk assessment, we have included the suppliers that will have a significant actual and potential negative social impact if not living up to a framework.

no_	Name	Country	Risk revenue	Category of products	Risk category
9942	Supplier XX	China	H	Tents and accessories	H
9799	Supplier XX	China/Bangl.	H	Tents	H
9860	Supplier XX	Vietnam	H	Tents	H
9752	Supplier XX	Bangladesh	M	Tents	H
9664	Supplier XX	Cambodia	L	Tents	H
9872	Supplier XX	China	M	Sleeping	M
9845	Supplier XX	China	M	Furniture	M
9973	Supplier XX	China	M	Coolboxes	M
9968	Supplier XX	China	L	Furniture	M
9825	Supplier XX	China	L	Sleeping and furniture	M
9745	Supplier XX	China	L	Sleeping	M
9665	Supplier XX	China	L	Pumps	M
9764	Supplier XX	China	L	Tents	H
9604	Supplier XX	China	L	Furniture	M
9797	Supplier XX	China	L	Sleeping	M

Risk revenue: according to size of business - Risk category: according to strategic importance to us.

High risk = H, Medium risk = M, Low risk = L.

4.3. Employee Satisfaction

4.3.1. Why relevant

Besides our specialist knowledge, our most valuable resource is our employees and it is in our DNA as a family-started and family-run business to foster this special relationship and nurture our workforce.

4.3.2. Scope

Our Employee Satisfaction survey encompasses active full-time employees only and who have worked for Oase Outdoors for a minimum of three months and who is not on leave for more than six months.

4.3.3. Management approach

The survey is conducted by an external independent party and anonymity is guaranteed. Only departments with a minimum of five employees receive a separate report.

4.3.4. Activities

The current survey was conducted by Great Places to Work in autumn 2020 and the data was presented in November. All employees have had input on the results at departmental level to help make Oase Outdoors an even greater place to work. The high engagement and impact of the results in each department provide a good indicator for managerial action.

4.3.5. Results

The Trust Index of 83 per cent is a very high level against a KPI of 80 per cent.

4.3.6. Indicators

Although there has been no real increase in the Trust Index figure compared to 2019 the result is still highly satisfying and the KPI is at a very high level compared to that of benchmark companies. See table below.

GREAT PLACE TO WORK	OASE OUTDOORS 2020	Oase Outdoors 2018	Oase Outdoors 2019	Oase Outdoors 2020
		CREDIBILITY AVERAGE	81%	78%

6. GRI INDEX ⁽¹⁰²⁻⁵⁵⁾

We have not had the report audited. There are some limitation to the scope. Further, our materiality analysis is based on a limited

number of customers and employees. However, a substantial amount of internal work has been completed to ensure we target critical areas.
